

# Information Pack

## Learning to SCUBA dive

In general, learning to SCUBA dive is not difficult. It takes a little time, patience and practice.

The initial wonderful and exciting feeling of being able to breathe underwater is soon overtaken by the exhilaration of "flying" weightless through the wonderful underwater world.

We take you step by step through exercises to increase your confidence and enhance your diving experience. In conjunction with the practical work, we reinforce all the aspects of safety and enjoyment through instructor demonstrations and theory presentations at the Dive Centre.
